Behavior Review Form  
Intermediate Care Facility/Individuals with Intellectual Disabilities

Directions: Answer the following by tracing the individual maladaptive behaviors through the behavioral loop.

Item	Data	Data	Data	Data
Related Diagnosis: contributes to understanding of behavior and/or person (demographics)				
Observed Behavior: hit, kick, spit, etc.; in measurable and observable terms, and baseline				
Function of Behavior: potential causes that elicit and sustain the behavior (i.e., attention-seeking, history of punishing experiences, psychiatric symptom)				
Reactive Intervention Objective: based on assessment; includes methods				
Proactive Strategy: including replacement behavior to elicit positive behavior

Surveyor:

Behavior Review Form  
Intermediate Care Facility/Individuals with Intellectual Disabilities

Item	Data	Data	Data	Data
Data Collection: method and frequency, sufficient to assess progress/regression				
Behavior Modifying Drugs and Restraint: restraint reduction, medication use, and reduction				

Directions: Fill in appropriate information.

Questions	Answers
Does the diagnosis match the behavior?	
Do the antecedent events match the function of the behavior?	
Are there objectives for all identified behaviors?	
Are the replacement behaviors appropriate based on the function of the behavior?	
Are intervention methods appropriate (i.e., environmental controls are included, intervention strategies are built in for antecedent behaviors, interventions are appropriate to the maladaptive behaviors displayed)?	
Is the assessment congruent with what was observed and what staff said?
